# SAGE 100 MOBILE SALES APP

Sales Mobility At Your Fingertips

Accurate and effective selling processes are essential to your bottom line. Providing your salespeople with the ability to view and sell the right quantities, capture signatures, and print receipts will not only improve customer satisfaction, but will significantly boost your profit margin. Schedule a demo.

Key Features:

Seamless Integration
Access critical data including customer, pricing, and inventory availability seamlessly.

Wireless & Mobile
Access data in real-time from anywhere at any time including ability to function in batch mode with data/customer lookup and validation when disconnected.

Mobile Device & OS Agnostic
Compatible with any device: smartphone, tablet, or ruggedized mobile computer and any OS: iOS, Android, or Windows.

Quoting & Invoicing Control
Accurately create quotes, sales orders, invoices, and credit memos, plus ability to view customer contact info, inventory, images, and purchase history.

Proof of Delivery
Signature capture and photos to electronically verify and record when your products were delivered and received.

Third-Party Integrations
Established integrations into Avalara sales tax automation, credit card processing, and many others.

Why ScanForce?

ScanForce develops software solutions for Sage 100 users. Warehouse management, inventory control, mobile sales and manufacturing automation software empowers users to increase accuracy and efficiency, optimize workflows and improve profitability.
